

Shashank S Mayya

Senior Flutter Developer & Mobile App Specialist

Mangalore, India | shashanksmayya@gmail.com | shashanksmayya.dev | linkedin.com/in/shashank-mayya

SUMMARY

Flutter developer with 5+ years of experience building apps where reliability matters. Specialized in fintech, trading platforms, and AI consumer apps, including a stock trading platform for a SEBI-registered broker that serves thousands of live traders. 10+ apps shipped for clients across India, Canada, Ireland, and the US.

EXPERIENCE

Freelance Flutter Developer · Self-Employed Apr 2023 - Present

Freelance Flutter development for clients across fintech, consumer, and enterprise. Currently the lead mobile developer on Outfit Formulas, an AI-powered outfit planning app.

- Delivered 10+ production apps end-to-end for clients across India, Canada, Ireland, and the US
- Built a stock trading platform for a SEBI-registered broker, serving thousands of live traders during market hours
- Lead mobile developer on Outfit Formulas, an AI-powered styling app with subscriptions and experiment-driven onboarding
- Wrote unit and widget test suites for Outfit Formulas and unit tests for the Pragati ERP client app
- Shipped blockchain ticketing with non-custodial wallet security and QR/NFC check-in for a European events client
- Integrated AI backends, real-time WebSocket pipelines, payments (RevenueCat, Stripe), and analytics (PostHog, Braze)

Flutter Dart Firebase Supabase BLoC WebSockets RevenueCat PostHog

Software Engineer · Realtime Innovations, Dublin, Ireland Dec 2022 - Apr 2023

Collaborated with an international team to build the Mevolve healthcare application using Flutter and Firebase.

- Optimized Firebase operations reducing costs by 40%
- Implemented custom caching with Isar Database
- Worked with Cloud Functions for backend operations
- Improved app performance and user experience

Flutter Firebase Isar DB Cloud Functions Performance Optimization

Flutter App Developer · Mindstack Technologies, Mangaluru, India Jul 2021 - Dec 2022

Built fintech apps from scratch, focused on payment systems and financial services.

- Developed 3 fintech apps from design to production
- Integrated payment gateways and financial APIs
- Implemented BLOC architecture and dependency injection
- Set up CI/CD pipelines and analytics tracking

Flutter BLoC Hive GetIt Payment Gateways

SELECTED PROJECTS

Firststock Trading App · [Play Store](#) · [App Store](#)

- Full-featured stock trading platform for a SEBI-registered Indian broker: equities, F&O, IPOs, and mutual funds across 123+ screens
- Real-time WebSocket market data with heartbeat monitoring and exponential-backoff reconnection, serving thousands of concurrent traders at peak market hours
- Clean architecture with Remote Config feature flags let IPO and Mutual Funds modules ship without disrupting live trading

Outfit Formulas · outfitformulas.com · [Play Store](#) · [App Store](#)

- AI-powered outfit planning app for iOS and Android, built around ALI, an AI stylist chat with text, photo, and voice input
- Led a full V2 rewrite from Riverpod/go_router to BLoC/auto_route on a live subscription app without disrupting paying subscribers
- Experiment-driven onboarding with frozen analytics contracts in PostHog; subscriptions via RevenueCat and Stripe
- Firebase Cloud Functions written in TypeScript, with unit and widget test suites covering core logic and UI

Zontix · zontix.com

- Blockchain event ticketing app on MultiversX: NFT tickets with Google Pay, Apple Pay, and card payments for mainstream users
- Non-custodial wallet security with BIP44 HD generation, AES-GCM encryption, and Shamir's Secret Sharing seed-phrase backup
- Dual QR/NFC check-in via Android HCE and iOS CoreNFC behind a unified scanner service, with offline-first caching for venues

TacticX · tacticx.trade

- Crypto options trading platform built with Flutter Web compiled to WASM, holding 60fps during heavy live market streaming
- Visual multi-leg strategy builder with payoff diagrams and position Greeks; isolate-based WebSocket parsing keeps the UI responsive

Dota 2 Soundboard · [Play Store](#)

- Personal product with 10k+ downloads and 1.5k+ monthly active users; rebuilt from scratch for the 3.0 release
- Over-the-air content packs from a Cloudflare R2 CDN ship new sounds without store releases; full library re-encoded to Opus
- Set-as-ringtone, notification, and alarm feature written natively in Kotlin and bridged to Flutter over a method channel

SKILLS

Mobile Development	Flutter · Dart · iOS Dev · Android Dev · Flutter Web
Backend & Database	Firebase · Supabase · TypeScript · Hive DB · Isar DB
Architecture & Tools	BLoC Pattern · Clean Architecture · Unit & Widget Testing · Git & CI/CD · REST APIs · WebSockets

EDUCATION

Bachelor of Engineering - Computer Science · AJ Institute of Engineering and Technology, Mangaluru	2017 - 2024
Pre-University Course (Science) · Sharada PU College, Mangaluru	2015 - 2017

TALKS & RECOGNITION

GDG Mangalore Speaker	December 2023
Conducted a technical talk on "Building Scalable Flutter Applications" for Google Developer Group Mangalore community. linkedin.com ↗	
IEEE Mangalore Presentation	2023
Presented "Flutter BLOC State Management in Production" to IEEE Mangalore Subsection, sharing real-world implementation insights. youtube.com ↗	
Flutter Mentorship Program	2022-2023
Mentored a team of students in developing an IoT-based Flutter application for Rosette Smart Bottles startup.
