

Shashank S Mayya

Full-Stack Mobile Engineer · Flutter, Firebase & AI

Mangalore, India | shashanksmayya@gmail.com | shashanksmayya.dev | linkedin.com/in/shashank-mayya

SUMMARY

Full-stack mobile engineer with 5+ years across Flutter apps, backend, and system architecture, designing with the user's experience in mind. Specialized in fintech, trading, and AI consumer apps, including a trading platform for a SEBI-registered broker serving thousands of live traders. 10+ apps shipped for clients across India, Canada, Ireland, and the US.

EXPERIENCE

Freelance Full-Stack Mobile Engineer · Self-Employed Apr 2023 - Present

Freelance product engineering across fintech, consumer, and enterprise; lead engineer on Outfit Formulas.

- Delivered 10+ production apps end-to-end for clients across India, Canada, Ireland, and the US
- Built a stock trading platform for a SEBI-registered broker, serving thousands of live traders during market hours
- Lead engineer on Outfit Formulas across the Flutter app, Firebase backend, community feature, and OpenAI-powered features
- Wrote unit and widget test suites for Outfit Formulas and unit tests for the Pragati ERP client app
- Shipped blockchain ticketing with non-custodial wallet security and QR/NFC check-in for a European events client
- Integrated AI backends, real-time WebSocket pipelines, payments (RevenueCat, Stripe), and analytics (PostHog, Braze)
- Daily AI-assisted workflows: Claude Code with custom project skills, shared agent rules, and cross-repo code indexing

Flutter Dart Firebase Cloud Functions TypeScript OpenAI Supabase BLoC WebSockets RevenueCat PostHog

Software Engineer · Realtime Innovations, Dublin, Ireland Dec 2022 - Apr 2023

Collaborated with an international team to build the Mevolve healthcare application using Flutter and Firebase.

- Optimized Firebase operations reducing costs by 40%
- Implemented custom caching with Isar Database
- Worked with Cloud Functions for backend operations
- Improved app performance and user experience

Flutter Firebase Isar DB Cloud Functions Performance Optimization

Flutter App Developer · Mindstack Technologies, Mangaluru, India Jul 2021 - Dec 2022

Built fintech apps from scratch, focused on payment systems and financial services.

- Developed 3 fintech apps from design to production
- Integrated payment gateways and financial APIs
- Implemented BLOC architecture and dependency injection
- Set up CI/CD pipelines and analytics tracking

Flutter BLoC Hive GetIt Payment Gateways

SELECTED PROJECTS

Firststock Trading App · [Play Store](#) · [App Store](#)

- Full-featured stock trading platform for a SEBI-registered Indian broker: equities, F&O, IPOs, and mutual funds across 123+ screens
- Real-time WebSocket market data with heartbeat monitoring and exponential-backoff reconnection, serving thousands of concurrent traders at peak market hours
- Clean architecture with Remote Config feature flags let IPO and Mutual Funds modules ship without disrupting live trading

Outfit Formulas · [outfitformulas.com](#) · [Play Store](#) · [App Store](#)

- AI styling app; lead on the Flutter app and Firebase backend, and owner of the FastAPI AI backend since Oct 2026
- Architected community end to end: Firestore data model and rules, optimistic REST writes, flag-gated staged rollout
- OpenAI-powered Cloud Functions in TypeScript for closet titles and outfit tags, with validation and scoring of model output
- Led a full V2 rewrite from Riverpod/go_router to BLoC/auto_route on a live subscription app without disrupting paying subscribers

Zontix · [zontix.com](#)

- Blockchain event ticketing app on MultiversX: NFT tickets with Google Pay, Apple Pay, and card payments for mainstream users
- Non-custodial wallet security with BIP44 HD generation, AES-GCM encryption, and Shamir's Secret Sharing seed-phrase backup
- Dual QR/NFC check-in via Android HCE and iOS CoreNFC behind a unified scanner service, with offline-first caching for venues

TacticX · [tacticx.trade](#)

- Crypto options trading platform built with Flutter Web compiled to WASM, holding 60fps during heavy live market streaming
- Visual multi-leg strategy builder with payoff diagrams and position Greeks; isolate-based WebSocket parsing keeps the UI responsive

Dota 2 Soundboard · [Play Store](#)

- Personal product with 10k+ downloads and 1.5k+ monthly active users; rebuilt from scratch for the 3.0 release
- Over-the-air content packs from a Cloudflare R2 CDN ship new sounds without store releases; full library re-encoded to Opus
- Set-as-ringtones, notification, and alarm feature written natively in Kotlin and bridged to Flutter over a method channel

SKILLS

Mobile Development	Flutter · Dart · iOS Dev · Android Dev · Flutter Web
Backend & Database	Firebase · Firestore Modeling · Cloud Functions · Security Rules · Supabase · TypeScript · Hive / Isar
AI Integration	OpenAI API · Gemini · Prompt Design · LLM Output Validation · Python / FastAPI · AI-Assisted Development
Architecture & Tools	System Design · BLoC Pattern · Clean Architecture · Unit & Widget Testing · Git & CI/CD · REST APIs · WebSockets · UX Thinking

EDUCATION

Bachelor of Engineering - Computer Science	AJ Institute of Engineering and Technology, Mangaluru	2017 - 2024
Pre-University Course (Science)	Sharada PU College, Mangaluru	2015 - 2017

TALKS & RECOGNITION

GDG Mangalore Speaker	December 2023
Conducted a technical talk on "Building Scalable Flutter Applications" for Google Developer Group Mangalore community. linkedin.com ↗	
IEEE Mangalore Presentation	2023
Presented "Flutter BLOC State Management in Production" to IEEE Mangalore Subsection, sharing real-world implementation insights. youtube.com ↗	
Flutter Mentorship Program	2022-2023
Mentored a team of students in developing an IoT-based Flutter application for Rosette Smart Bottles startup.
